## Simple configuration of integration scenarios

Cloud Integration Automation service provides you a guided workflow to integrate SAP cloud solutions to on-premise and other SAP cloud solutions. The guided workflow contains instructions for manual and automated tasks to enable an easy and quick integration configuration setup.

The screenshot shows the SAP Integration Suite home page. On the left, a sidebar lists navigation options like Home, Discover, Design, Test, Configure, Monitor, Analyze, Engage, Inspect, Monetize, and Settings. The main area features a blue header with the title 'Simple configuration of integration scenarios' and a sub-section about Cloud Integration Automation. Below this is a 'Recent' section for artifacts and a 'Monitoring' section for API proxy traffic and errors. The monitoring section includes three cards: one for integrations and APIs showing 3 total started calls, another for API proxy traffic showing 0 total calls with a chart, and a third for API proxy errors showing 0 total errors with a note 'No items available'. At the bottom, there's a navigation bar with icons for search, file, browser, and system status.

Configure and raise alerts for specific scenarios

SAP Alert Notification service for SAP BTP offers a common API for providers to publish alerts and for consumers to subscribe to these alerts. It is designed to send automatically real-time notifications and alerts about events that may be of interest to the business and operations.
